Matsuura H.Plus-405

Upgraded Standard Specification [compared to previous model]

- Strokes of all axes has been increased to 660 mm (25.98 in.) [+60 mm (2.36 in.)].
- Max. work piece envelope increased to ø700 x
 H850 mm (ø27.55 x H33.46 in.)[+ø50mm, +H100 mm (ø1.96 in., +H3.93in.)]. No competitor machine has a larger working envelope.
- Rapid traverse rate (X/Y/Z) increased to 60 m/min (2,362 ipm) [+10 m/min (393.7 ipm)].
- Min. distance from spindle to pallet center reduced to 70 mm (2.75 in.) [-50 mm (1.96 in.)]
- 60 tools ATC as standard incorporating a new Matsuura developed high speed ATC tool indexing system.
- High speed indexing increased to 100 min⁻¹ [+50 min⁻¹], the rotary table can be supplied with a DD Motor as an option.
- Floor space reduced by **12%** to 10.0 m².

Superb Reliability

- THERMAL MEISTER ™ (Thermal Displacement Compensation for Spindle & Feed Axis) is provided as standard.
- Feed Axis Grease Auto Supply System is provided as standard.
- Powerful Swarf Management by W-Type Slide Cover
 + X-Type APC Door.

User Friendly

- Ergonomic design based around maximum operator comfort & productivity.
- Supplied with powerful NC Options Matsuura G-Tech 30i

Unmanned Multi Pallet Excellence

Matsuura offer 2 proven, expandable & highly productive multi pallet systems – tailored to your production process

Type	Features	Production Volume	Number of Pallets	
Floor Pallet System	Compact, fully integrated & expandable multi pallet system	Low to Medium Volume	PC6	
Tower Pallet System	Vertically aligned space saving multi pallet system	Medium to High Volume	PC12	

PC6

Drum Magazine High Speed Index, Low Noise

Standard

Designed & fully proven by Matsuura this new drum magazine offers vastly reduced tool change times when compared to conventional designs. Tool indexing time has been reduced by a massive 60%. With less moving parts than standard ATC's, a design imperative from the outset was the elimination of un-necessary noise & vibration.

Drum Magazine - Specification

ATC time 2.7 sec.

Max. Tool Length 350 mm (13.77 in.)

Max. Tool Diameter 80 mm (3.14 in.) 150 mm (5.90 in.) When the pockets on both sides are empty

Max. Tool Weight 10 kg (22 lb.)

Matrix Magazine Space Saving, Large Capacity

Option

Offering unparalleled capacity, functionality & reliability Matsuura's Matrix ATC Systems support the growing global requirement for extended periods of unmanned CNC production

New ATC touch panel display - larger screen, ergonomic & user friendly.

All tool management & ATC functionality can be controlled from this screen.

All Tools

NG Tools

Auto Recovery

All Matsuura ATC's are well lit & user friendly.

Max. Tool Diameter 80 mm (3.14 in.) **150 mm** (5.90 in.)

When the pockets on both sides are empty

10 kg (22 lb.)

Max. Tool Length

NC Controlled Indexing Rotary Table: High Speed, Accuracy & Reliability

DD Motor Driven 100 min⁻¹

The DD (Direct Drive) motor driving the NC controlled rotary table indexes twice as fast as a conventional worm gear set up.

DD Motors also possess the added advantage of being non contact. The non contact aspect of the DD Motor also eliminates not only the abrasive wear on components associated with conventional worm gear set ups but also completely removes backlash, offering increased and sustained positional accuracy as well as high speed operation.

The functional simplicity and reliability of the DD mechanism is also maintenance free.

DCS Dynamic Clamp System

PATENT PENDING

Matsuura are proud to announce the development of our DCS System (Dynamic Clamp System).

This automatic feature of the DD Motor mechanism will clamp the rotary table if and when a predetermined force greater than the DD Motor can hold is brought to bear against it – as in heavy milling operations.

Once the force is lower than the pre-determined level, the clamp will automatically remove itself. This set up offers yet another substantial advantage over traditional worm gear set ups.

Owing to the automatic functionality of the DCS System, un-necessary clamping is eliminated – offering further reductions in indexing, cycle & operational times.

Conventional Machining

B Table Clamp Machining Table Unclamp 0.0

M21 M22

Application of the DCS system.

-On the light machining, it skips M21 operation.

-On the heavy duty machining, if the loading force exceeds a designated value then it keeps M21 command.

Application of the DCS system

B Machining B REDUCTION

Proven, State of the Art Spindle

Matsuura MAXIA Spindle

The heart of all Matsuura machines – the Matsuura MAXIA Spindle, from the original pioneers of High Speed Spindles. With integrated grease lubrication, noise output lower than 75dB and vastly reduced air consumption all Matsuura Spindles offer years of reliable service and maintenance free operation.

All Matsuura Spindles are designed and built in house at our clean room centers of excellence in Fukui Japan & Leicestershire England.

12,000 min⁻¹ Standard

Motor Power : 15 / 22 kW (30 HP) Motor Torque : 187.3 N·m/1,120 min⁻¹ 20,000 min⁻¹ Option

Motor Power: 15 / 18.5 kW (25 HP) Motor Torque: 108.5 N·m/1,320 min⁻¹ Spindle Grease Auto Supply System

• 30,000 min⁻¹ spindle is available as option

Vacuum Type Coolant Thru Spindle System

Option

This newly proven option removes all residual coolant from the tool and spindle during tool changing operations.

Effective & Reliable Swarf Management

W-Type Slide Cover

The Z-axis protective cover offers a slant of 45 deg – assuring rapid fall away of swarf & chips. The design of the enclosure ensures no swarf traps – protecting your unmanned production processes & offering peace of mind, lights out unattended operation.

X-Type APC Door

PATENT PENDING

The new design of the X-Type APC door between the machining enclosure and the APC has proven itself to be highly effective in eliminating swarf build up around the APC door.

Thermal Displacement Compensation

THERMAL MEISTER ™

Standard

PATENT PENDING

Thermal Meister ™ monitors the temperature of the spindle and the X, Y and Z axes and supplies a constant feed of compensation values to the NC to maintain assured accuracy.

Schematic of the THERMAL MEISTER ™ system

Improved Accessibility

The minimum distance from pallet center to spindle gauge line has been reduced by 50 mm (120mm → 70mm). Even though Matsuura **H.Plus** machines are renowned for their rigidity, previously unattainable levels of ultra rigid machining with shorter cutter lengths can now be effortlessly achieved.

H.Plus-405 Movement Ranges(Y&Z-Axis)

Minimum Maintenance

An automatic grease supply unit as standard feeds the spindle & all axes – eliminating maintenance intervention.

All equipment & systems requiring maintenance are conveniently located at the rear of the machine – designed for easy access.

Reduced Machine Footprint

The newly designed **H.Plus-405** requires 12% less floorspace than the previous model.

The Latest High Performance NC

Matsuura G-Tech 30i

High speed CPU and FSSB, internal CNC bus, optical fiber cables used for high speed data transfer.

Nanometer resolution.

10.4 inch color LCD, Compact flash port, PC file management structure.

For High Speed & Superb Surface Finish

Machining for General Parts or Mold & Die

IZ-1/15F

Standard

Machining for more Complex, Precision Parts

IZ-1/30NF, IZ-2/150NF

(Look Ahead Linear Acc./dec.+ Nano interpolation)

Option

Executing the max. 200(IZ-1/30NF) or 600*(IZ-2/150NF) - block look ahead linear acc./dec. before interpolation achieves a smooth acc./dec. across the multiple blocks calculated by nano order.

* Max. 1,000 block available as option.

Proven Software Performance

IPC

High-Speed Precision Machining Program Support Function

Standard

When utilizing this software, setting the required part accuracy level is quick, simple and user friendly, allowing you to prioritize precision against speed.

Image of IPC

Handy Man II

Standard
